SUMMARY

As a computer science undergraduate, I bring proficiency in the MERN stack and multiple programming languages. My strengths lie in collaborative problem-solving and a commitment to staying current with industry trends. I have a proven track record of creating user-friendly, responsive applications. With these skills, I am well-prepared to excel in full-stack development.

VOLUNTEER PROJECTS

SecuResult : Save your result with web3   08/2023 - Present

This is a **MERN stack** project integrated with **blockchain** technology. It is a web application designed to securely store and share results. This project is being developed by a four-member team.
- In this project I'm working as backend developer.
- Managing the database.

TaskMinder : Save your day..   06/2023 - 07/2023

This is a personalized to-do list saver with custom list maker features and using **advanced security** like **oAuth**, built with **Node.js**, **Express**, and **MongoDB**.

TinDog : Find a perfect mate for your dogs   05/2023 - 05/2023

This frontend website, crafted with **HTML**, **CSS**, and **Bootstrap**, prioritizes responsive design for an optimal user experience. It embodies modern web development standards, ensuring compatibility across devices and screens.

EDUCATION

Bachelor of Technology in Computer Science in Engineering   02/2021 - Present

Heritage Institute of Technology,Kolkata

GPA | **7.6** / 10

All India Senior School Certificate Examination-Science Stream   2018 - 2020

DAV Public School,Asansol

PERCENTAGE | **89** / 100

PASSIONS

💎 Passionate about web development, excelling in front-end and back-end, with a proven track record of impactful projects. Eager to innovate and contribute to your team

STRENGTHS

💎 **Problem-Solving Skills.**
- Developed through coursework, coding challenges, and troubleshooting complex issues in personal projects.
- Effectively identify and resolve technical issues, leading to improved system performance and user experience.
